Roads

Our municipality have been able to design built a bridge at Manzana and is about to be completed.

This project is implemented through the involvement of community members.

That is the way in which the Municipality is building it is enhancing its institutional capacity.

Furthermore honourable Speaker, we are establishing unit that will be in Technical Service that will be able to maintain all our electrical and mechanical assets. By so doing we are delivering on our manifesto commitment of reducing outsourcing.

We are planning to construct roads for the 2017/18 financial year to do 5 km roads.

Our appreciation goes to the Premier and the Executive Mayor of GSDM for the regravelling of our streets. The program will continue during the financial year 17/18.

Local Development Forum has been launched.

Honourable Speaker, we are committing ourselves again to reduce poverty, unemployment by supporting cooperatives.

40% of our procurement in 2017/18 will be sourced from cooperatives. Our youth consist of more than 70% in our society, many of them are not working, and we need to work together with private sectors to equip them with relevant skills. As municipality we are planning to launch a youth forum; where by all issues that affect young people are going to be address.

Finance and governance.

As we will be passing the budget and the IDP, we appreciate the team work which is happening in this municipality.

As a results of that, we were able to:

- Launch ward committees

- Our budget is MSCOA compliant and we are confident that we will go live before the 1st of July. So says provincial treasury and cogta.

All our Governance structures are functioning very well Honourable Speaker.

The same goes to our oversight structures and thanks to your good self-honourable Speaker.

Violence

The violence against women is condemned on the strongest terms.

Let me borrow from the collections of Ben Turok titled revolution in the 20th century.

“How can the revolution triumph without the liberation of women? Will it be possible to get rid of the system of exploitation while keeping one part of society exploited?”

By so saying honourable Speaker the incidents of killing young girls is not only affecting areas that are shown on TV. The Masuku family of Nhlazatshe no 1 has also been victims.

On the same sad note honourable Speaker, our condolences to the Nkutha family, a young man who has been killed here at Silobela. We condemn that.

In Conclusion.

We are moving forward towards:

- Reducing water, sanitation, refuse removal, electricity supply backlogs to Zero.
- Growing our economy by 5%

Steadily but sure we are coming: Lekkerloop, Mbejeka, Kromkrans, Mafufumbe, Sandleni and Schoeman.

Thank the Municipal Manager for the preparation of this budget and the IDP

I thank you.

Executive Summary

EXECUTIVE SUMMARY ON THE 2017/18 TO 2019/20 MEDIUM TERM REVENUE AND EXPENDITURE FRAMEWORK (MTREF) TABLE ANNUAL BUDGET

1. Report by the Chief Financial Officer

The adoption of the draft multi-year 2017/20 Medium Term Budget for the Chief Albert Luthuli Municipality laid the foundation by which strategic functions within the municipality could apply sound financial planning. The budget is aligned with the IDP and the SDBIP.

The Executive Mayor Clr. D.P. Nkosi coordinated the budget process for preparing the annual budget and for reviewing the municipality's integrated development plan and budget-related policies to ensure that the tabled budget and any revisions of the integrated development plan and budget-related policies are mutually consistent and credible.

The budget comply with the Municipal Finance Management Act (No. 56 of 2003) and is a financial plan to enable the municipality to achieve its vision and mission. The budget process started in August 2015 when the Council approved the budget timetable in terms of S21 of the MFMA.

The 2016 Medium Term Budget Policy Statement emphasised that the global recovery from the 2008 financial crisis remains precarious, with growth forecast at 3.1 per cent in 2016 and 3.4 per cent in 2017. In developed economies, the combination of weak economic growth, low or negative interest rates, and elevated asset prices has increased the likelihood of renewed financial volatility. Countries that are highly reliant on foreign savings, such as South Africa, will remain vulnerable to global financial volatility and rapid capital outflows. While global economic weakness plays a large role in South Africa's economic growth performance, domestic constraints stand in the way of investment, output and trade.

Domestic GDP growth for 2016 was forecasted at 0.9 per cent at the time of the 2016 Budget and it has since been revised to 0.5 per cent. It is anticipated that factors such as a more reliable electricity supply, improved labour relations, low inflation, a recovery in business and consumer confidence, stabilising commodity prices and stronger global growth will increase growth to 2.2 per cent by 2019. Furthermore, the country has experienced a decline in mining growth and weakened agricultural outputs as a result of the drought while growth in transport and telecommunications, electricity, gas and water have declined because of weakened demand.

Budget Assumptions

The ability of customers to pay for services was considered and the municipality implemented the new valuation roll effective from the 01st July 2017. The maintenance of the general valuation roll is critical. The municipality considered the following when compiling their 2017/18 MTREF budgets:

- Effective and efficient revenue management processes;
- Implementation of cost containment measures;
- Providing affordability tariffs increases
- Increase additional revenue sources

Municipal Standard Chart of Accounts (mSCOA)

The mSCOA Regulations apply to all municipalities and municipal entities with effect from 1 July 2017. This means that the compilation of the 2017/18 Medium-Term Budget and Expenditure Framework (MTREF) must be compliant with the mSCOA classification framework.

ESKOM Bulk Purchases

In terms of the Multi-Year Price Determination (MYPD) for Eskom's tariffs approved by the National Energy Regulator of South Africa (NERSA), a tariff increase of 8 per cent has been approved for the 2017/18 financial year.

Municipalities were urged to examine the cost structure of providing electricity services and to apply to NERSA for electricity tariff increases that reflect the total cost of providing the service so that they work towards achieving fully cost-reflective tariffs that will help them achieve financial sustainability. Municipalities in arrears with Eskom should ensure that their payment arrangements are effected in their 2017/18 MTREF budget.

Employee Related Costs

The South African Local Government Bargaining Council entered into a three-year Salary and Wage Collective Agreement for the period 01 July 2015 to 30 June 2018. The preparation of the 2017/18 MTREF constitutes implementation of the last year of the agreement which municipalities must implement as follows:

- 2017/18 Financial Year – average CPI (Feb 2016 – Jan 2017) + 1 per cent

The previous years were: • 2015/16 Financial Year – 7 per cent • 2016/17 Financial Year – average CPI (Feb 2015 – Jan 2016) + 1 per cent 5

Municipal budget is based on a forecasts of :-

Fiscal Year	2015/16 Actual	2016/17 Estimate	2016/18 Forecast	2018/19 Forecast	2019/20 Forecast
CPI Inflation	4,6%	6,4%	6,1%	5.9%	5.8%

PART 2

Overview of the budget process

1. Overview of the budget process

The budget process is an effective process to ensure good governance and accountability. The process outlines the current and future direction that the municipality would follow in order to meet legislative requirements. The budget process enables the municipality to optimally involve residents and other stakeholders in the budgeting process. The budget preparation process is guided by the following legislative requirements:

- Municipal Finance Management Act
- Municipal Systems Act and
- Municipal Structures Act

Section 21 of the MFMA requires that a time schedule setting out the process to draft the IDP and prepare the budget be tabled ten months before the financial year. In compliance with this requirement the IDP and budget time schedule was tabled before council in August 2015. The main aim of the timetable is to ensure integration between the Integrated Development Plan, the budget and allied process towards tabling a balanced budget

The purpose of the 2017/20 Medium Term Budget is to comply with the Municipal Finance Management Act (No. 56 of 2003) and it requires buy in from communities, politicians and municipal officials

The adoption of the draft multi-year budget for 2017/20 laid the foundation by which strategic functions within the municipality could apply sound financial planning and management over the medium to long term. The draft budget strives to improve the quality life of citizens of Chief Albert Luthuli Municipality.

The municipality's revenue strategy is based on the following key components:

- The municipality implemented new valuation roll on 1st July 2016;
- The budget is based on a collection rate of 65% from property rates, electricity, refuse removal, sanitation and water.

- Installation of split meters
- Effective implementation of the Credit Control and Debt collection by-law
- The accounting officer will immediately inform the National Treasury of any payments due by an organ of state to the municipality in respect of municipal tax or for municipal services, if such payments are regularly in arrears for periods of more than 30 days.
- To create an environment for business growth and investments conducive to economic development, and to ensure financial sustainability of the municipality into the future.

The municipality will continue to create jobs through EPWP projects and also to attract investors that will create jobs through LED programmes

It is important that the financial position of the municipality remains sustainable over the medium term facing the current constraints.

To assist our communities to alleviate poverty, inequality and unemployment the following social packages are included in the budget for households:

- Free Basic Water – 6kl per month for every households
- Free Basic Electricity - 50kWh per month for registered indigents
- 50% Discount on Sanitation Services for registered indigents
- 50% Discount on Refuse Removal Services for registered indigents

The tabled budget herewith presented provides for total operating revenue of R425 035 -million for 2017/2018 financial year and operating expenditure of R406 048-million with a surplus of R18 987 millions. The bulk of the revenue is derived from user charges for services and property rates of which property rates are the main contributing. .

2. Overview of alignment of annual budget with integrated development plan

Supporting table SA4, SA5 and SA6 provides a breakdown of all revenue, operating expenditure and capital expenditure aligned to the goals and actions of the IDP on a high level.

The annual budget is linked to the five (5) main strategic goals and objectives, which are:

- Municipal transformation and institutional development
- Local Economic Development (LED)
- Municipal financial viability
- Good governance and public participation
- Basic Service Delivery

Through the IDP process it was reconfirmed that the municipality is committed to the total well-being of all its citizens through:

- the rendering of affordable, cost effective, accessible, efficient and quality services for present and future customers.
- the maximizing of infrastructural development through the utilisation of all available resources.
- improving the quality of life by co-ordinating gender and social development programmes.
- the implementation of effective management systems and procedures.
- the creation of an enabling environment for LED.
- ensuring effective co-operation with relevant stakeholders.
- to ensure skilled, motivated and committed workforce.
- compliance with the Batho Pele principles.

3. Measurable performance objectives and indicators

Supporting table SA8 provides details on the financial indicators and benchmarks. The tabled budget was compiled considering the following main key performance indicators as a benchmark:

4. Overview of budget-related policies

The purpose of budget-related and financial policies is to provide a sound environment to manage the financial affairs of the municipality. The following are key budget relating policies which municipality has approved and where the policy doesn't exist the process of development will be looked at:

- **Tariff Policy** – the policy prescribes the procedures for calculating tariffs. This policy is required in terms of Section 74 of the Local Government Municipal Systems Act, Act 22 of 2000.
- **Rates Policy** – a policy required by the Municipal Property Rates Act, Act 6 of 2004. This policy provides the framework for the determining of rates. It further ensures certainty and clarity as to amounts payable in respect of property rates. The policy is submitted with the budget for review and be approved for public participation.
- **Free Basic services policy**- this policy aims to enhance the delivery of Free Basic Services to poor households, and assist municipality in developing innovative, reliable and integrated billing systems that would allow for improved delivery of services and an effective and efficient billing system for the debtors/consumers of the municipality. The policy is submitted with the budget for review and be approved for public participation.

- **Indigent Support Policy** – to provide access to and regulate free basic services to all indigent households. The policy is submitted with the budget for review and be approved for public participation.
- **Credit Control and Debt Collection Policy** – to provide for credit and debt collection procedures and mechanisms to ensure that all consumers pay for the services that are supplied. The policy is submitted with the budget for review and be approved for public participation.
- **Budget Policy** – this policy set out the principles which must be followed in preparing a medium term revenue and expenditure framework budget. It further ensures that the budget reflects the strategic outcomes embodied in the IDP and related strategic policies.

- **Asset Management Policy** – the objective of the policy is to prescribe the accounting and administrative procedures relating to property, plant and equipment (assets). The asset management policy it has incorporate the asset disposal processes.
- **Capital Investment and Infrastructure Development Policy**- the policy is not yet in place but strategies and programmes are being developed, they will be identified to form part of the financial plan to achieve the desired objective of improving financial viability, sustainability of the municipality, and capital investment on infrastructure. The policy will give guides on alternative funding models such as donor funding ect.
- **Borrowing policy**- The strong capital market in South Africa (banks and other lending institutions like DBSA, INCA etc.) provides an additional instrument to access financial resources. However, it is clear that the municipality cannot borrow to balance its budget and pay for overspending. The municipality's credit rating should also looked at. The finance will develop the policy during the second so that it forms part of public consultation in March 2013.
- **This Funding and Reserves Policy**- will set out the assumptions and methodology for estimating – projected billings, collections and all direct revenues; the provision for revenue that will not be collected; the funds the Municipality can expect to receive from investments; the dividends the Municipality can expect to receive from Municipal entitles; assets; the Municipality's borrowing requirements; and the funds to be set aside in reserves.
- **Accounting Policy** – the policy prescribes the basis of presentation of the annual financial statements in accordance with the General Recognised Accounting Practices and Accounting Standards, the policy will be reviewed during the preparation of annual financial statement.

Approved Budget Related Policies are on the Municipal Website

These policies are available on the official website www.albertluthuli.gov.za

5. Overview of budget assumptions

One of the key issues identified for the sustainability of Chief Albert Luthuli Local Municipality is to expand its revenue in relation to its costs and its financial viability, whilst implementing its mandate'. The responsive key objective is 'effective, efficient, coordinated financial management and increased revenue that will enable the Council to deliver its mandate'. The plans and strategies detailed in this chapter contribute to the will of achieving this objective

The selected key assumptions relating to this budget are as follows:

- Government grants for years 2017/2018 to 2019/2020 are as per the Division of Revenue Act.
- Provision has been made for tariff increases relating to other services at an average rate of 6% p.a.

6. Overview of budget funding

The budget is funded on the anticipated revenue from trading services such as water and electricity, though the council is experiencing low payment rate, it is anticipated that in the 2017/ 2018 budget year, collection rate will remain at average of 65%. The debt recovery plan will be put in place to ensure that the set objective is achieved. Proposed tariff adjustments to come into effect on 1 July 2017 are contained in the draft resolution.

A comparison on the imposing of assessment rates and setting of tariffs for the 2017/2018 financial year is included under Schedule 2 whilst the proposed tariffs for sundry services are included under Schedule 3.

Supporting table SA10 provides detail on funding measurement and funding supporting indicators.

7. Funding requirement for capital expenditure

It is therefore essential that the proposed capital budget carefully be considered and that the impact of all future developments on the current bulk infrastructure network strategically be considered.

3.1 In developing its Tariff Policy, the Municipality has noted the applicability of the following legislation –

3.1.1 Constitution of the Republic of South Africa, 1996

- 3.1.2 Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000)
- 3.1.3 Municipal Fiscal Powers and Functions Act, 2007 (Act No. 12 of 2007)
- 3.1.4 Municipal Finance Management Act, 2003 (Act No. 56 of 2003)
- 3.1.5 Water Services Act, 1997 (Act No. 108 of 1997)
- 3.1.6 Electricity Regulation Act, 2006 (Act No. 4 of 2006)
- 3.1.7 Local Government: Municipal Property Rates Act, 2004 (Act No. 6 of 2004)
- 3.1.8 Local Government: Municipal Structures Act, 1998 (Act No. 117 of 1998)

3.2 This policy complies with sections 74 of the Municipal Systems Act in so far as it –

- 3.2.1 establishes a tariff policy on the levying of fees for municipal services provided by the municipality;
- 3.2.2 reflects the required principles; and
- 3.2.3 differentiates between different categories of users, debtors, service providers. services, service standards and geographical areas as long as such differentiation does not amount to unfair discrimination.

3.3 Section 75 of the Municipal Systems Act requires the council to adopt by-laws to give effect to the implementation and enforcement of this tariff policy.

4. Tariff Principles

4.1 The Tariff Policy of the Municipality is in accordance with the principles as set out in section 74 (2) of the Municipal Systems Act as follows –

- 4.1.1** users of municipal services should be treated equitably in the application of tariffs;
- 4.1.2** the amount individual users pay for services should generally be in proportion to their use of that service;
- 4.1.3** poor households must have access to at least basic services through –
 - 4.1.3.1 tariffs that cover only operating and maintenance costs,
 - 4.1.3.2 special tariffs or life line tariffs for low levels of use or consumption of services or for basic levels of service; or
 - 4.1.3.3 any other direct or indirect method of subsidization of tariffs for poor households;

- 4.1.3.4 tariffs must reflect the costs reasonably associated with rendering the service, including capital, operating, maintenance, administration and replacement costs, and interest charges;
- 4.1.3.5 tariffs must be set at levels that facilitate the financial sustainability of the service, taking into account subsidization from sources other than the service concerned;
- 4.1.3.6 provision may be made in appropriate circumstances for a surcharge on the tariff for a service;
- 4.1.3.7 provision may be made for the promotion of local economic development through special tariffs for categories of commercial and industrial users;
- 4.1.3.8 the economical, efficient and effective use of resources, the recycling of waste, and other appropriate environmental objectives must be encouraged;
- 4.1.3.9 the extent of subsidization of tariffs for poor households and other categories of users should be fully disclosed.

4.2 In addition, the Municipality recognizes the principles set out in the 1998 White Paper on Local Government on user charges as follows –

- 4.2.1 Payment in proportion to the amount consumed – as far as it is practically possible, consumers should pay in proportion to the amount of services consumed.
- 4.2.2 Full payment of service costs – all households, with the exception of the indigent, should pay the full cost of services consumed.
- 4.2.3 Ability to pay – municipalities should develop a system of targeted subsidies to ensure that poor households have at least a minimum level of basic services.
- 4.2.4 Fairness – tariff policies should be fair in that all people should be treated equitably.
- 4.2.5 Transparency - the tariff policy should be transparent to all consumers and any subsidies and concessions must be visible and understood by all consumers.
- 4.2.6 Local determination of tariff levels - municipalities have the flexibility to develop their own tariffs in accordance with the principles contained.
- 4.2.7 Consistent tariff enforcement – a consistent policy for dealing with non-payment of tariffs needs to be developed. This must be targeted and enforced with sensitivity to local conditions.
- 4.2.8 Ensure local economies are competitive - local tariffs must not unduly burden local business through higher tariffs, as these costs affect the sustainability and competitiveness of such businesses and firms.

4.3 The tariffs asset out in this policy shall, as far as is practical, encourage and promote the objects and programmes contained in the municipality’s Integrated Development Plan.

5. Objectives of this Policy

5.1 The Municipality wishes to achieve the following objectives by adopting this tariff policy –

- 5.1.1** to comply with the provisions of section 74 of the Local Government: Municipal Systems Act, 2000 (Act 32 of 2000);
- 5.1.2** to prescribe procedures for calculating tariffs where the municipality wishes to appoint service providers in terms of section 76(b) of the Act; and
- 5.1.3** to give guidance to the Councillor responsible for finance regarding tariff proposals that must be submitted to Council annually during the budget process.

5.2 In addition, the Municipality seeks to ensure that –

- 5.2.1 the tariffs of the Municipality conform to acceptable policy principles;
- 5.2.2 municipal services are financially sustainable;
- 5.2.3 there is certainty in the Council of how the tariffs will be determined;
- 5.2.4 tariffs of the Municipality comply with the applicable legislation; and
- 5.2.5 tariffs should take into consideration relief to the indigent.

5.3 Tariffs will be set at a level that facilitates the sustainability of services, which will be achieved by ensuring that –

- 5.3.1 cash inflows cover cash outflows and that sufficient provision for working capital and bad debts will be made; and
- 5.3.2 access to the capital market is maintained, to be achieved through the provision for the repayment of capital, maintaining sufficient liquidity levels and making profits on trading services.

5.4 Where practical, efficient and effective use of resources will be encouraged by providing for penalties to discourage unnecessary or exorbitant usage.

6. Tariff Strategy

6.1 Minimum basic services must be free

- 6.1.1 This will be set out in the Free Basic Services Policy of the Municipality, and in order to ensure affordable services, the Council will introduce a stepped tariff structure in which consumers that use more of a service, will pay progressively more for higher consumption than those who consume less of a service.

6.2 Keeping tariffs affordable

- 6.2.1 In order to ensure that tariffs remain affordable, the Council will strive to ensure that –
 - 6.2.1.1 Services are delivered at an appropriate level;
 - 6.2.1.2 Efficiency improvements are actively pursued across the Municipality's operations;
 - 6.2.1.3 A performance management system is introduced to ensure that plans that are devised are actually implemented on its own resources are obtained as economically as possible and that appropriate service delivery mechanisms are used;
 - 6.2.1.4 An investigation is conducted with the objective of phasing out as soon as is practically possible the non-core functions that the municipality currently performs without depriving

the community of any services that really contribute to the quality of life of people in its area;

- 6.2.1.5 Any service that is provided for which there is little demand, is priced under the actual cost of providing it and which requires the Municipality to maintain significant infrastructure and other facilities, are phased out, except where the Council is by law required to provide such a service; and
- 6.2.1.6 The equitable share of revenue raised nationally will be used to maintain an adequate level of basic services for indigents.

6.3 Achieve price parity for services and property rates (uniform tariffs)

- 6.3.1 The Council will strive to achieve price parity within the Municipality within five financial years starting with the 2003/4 financial year.

6.4 Fully exploiting the potential income base

- 6.4.1 In order to ensure that tariffs remain current, and to ensure that all revenue is maximized, the Council will –
 - 6.4.1.1 Review tariffs for services at least once during every financial year.
 - 6.4.1.2 Ensure that tariff increases are in line with increases in the price of personnel costs, goods, material and other resources acquired and used by the Municipality to perform its functions; and
 - 6.4.1.3 Ensure that the tariff for a particular service will be calculated in such a way that all relevant costs are covered. This means that a tariff for a service must include at least the capital expenditure required and interest thereon, the cost of managing and operating the service and the cost of maintaining, repairing and replacing the physical assets used in its provision.

6.5 The “Consumer must pay Principle”

- 6.5.1 The Council believes that consumers of services must pay for the amount of services that they use. Where it is possible to measure the consumption of services, the Council intends to install metering systems and to take into account the free service element.
- 6.5.2 In this regard the Council will develop a programme to install meters in appropriate cases.
- 6.5.3 In the striving for better service delivery to the consumers, a user friendly format of accounts will be developed and implemented.

6.6 Redistribution / Cross-subsidisation

- 6.6.1 Some members of the community are better able to afford to pay for the services that they use and benefit from, than others. The budget of the Municipality is an important device in ensuring redistribution within the community. Those that pay higher property rates based on the value of their properties, in fact subsidise those who pay less tax.
- 6.6.2 Also, the Council uses the trading surplus it realizes on the trading account to bring relief with regard to property tax rates.

- 6.6.3** Likewise, the Council will ensure that the cross-subsidisation occurs between and within services to further contribute to its redistribution objectives.

6.7 Ensuring financial sustainability of service delivery

- 6.7.1** Financial sustainability of an enterprise will be achieved when it is financed in a manner that insures that its financing is sufficient.
- 6.7.2** The tariff for a service must, therefore, be sufficient to cover the cost of the initial capital expenditure required and interest thereon, managing and operating the service and maintaining, repairing and replacing the physical assets used in its provision.
- 6.7.3** The Council will adopt and apply a Credit Control and Debt Collecting policy to ensure that service charges are recovered.
- 6.7.4** Where a trading (water & electricity) and economic service (sanitation & sewerage) is available to a property, an availability levy or charge will be imposed if the occupier of the property does not use the service concerned or if the property is vacant. The availability levy, if possible, will be adequate to cover the pro rata cost of the initial capital expenditure and interest thereon and the maintenance of the infrastructure associated with service delivery.

7. Tariff determination process

- 7.1** Except in special circumstances, such as significant increases in the wholesale price of goods and services that the Council purchases during a year to provide services, the Council will review its tariffs during the preparation of the annual budget in accordance with the policy stated above. Proposed tariffs will be presented to the community during the Council's consultation about the budget.
- 7.2** After the Council has adopted its rates, tariffs, fees, charges and surcharges the Municipal Manager shall, without delay –
- 7.2.1** conspicuously display a copy of the resolution adopting such fees, charges or tariffs for a period of at least 21 days at the main administrative office of the municipality and at such other places within the municipality to which the public has access as the Municipal Manager may determine;
- 7.2.2** publish in a newspaper of general circulation in the municipality a notice stating –
- 7.2.2.1** that a resolution as contemplated above has been passed by the Council;
- 7.2.2.2** that a copy of the resolution is available for public inspection during office hours at the main administrative office of the municipality and at the other places specified in the notice;
- 7.2.2.3** the date on which the determination will come into operation;
- 7.2.2.4** that any person who desires to object to such determination or amendment must do so in writing within 14 days after the date on which the notice was displayed; and
- 7.2.2.5** that any person who cannot write may come during office hours to a place where a staff member of the municipality named in the notice, will assist that person to transcribe his/her objection.

- 7.2.3** seek to convey the information referred to in paragraph 3.8.2 to the local community by means of radio broadcasts covering the area of the municipality.
 - 7.2.4** The Municipal Manager must forthwith send a copy of the notice referred to in subparagraph 7.2.2 to the MEC for Housing and Local Government and other institutions regulated by another law or directive applicable from time to time.
-
- 7.3** If no objection is lodged within the period stated in the notice, the determination or amendment will come into operation on the date determined by the Council.
 - 7.4** Where an objection is lodged, the Municipality will consider every objection.
 - 7.5** The Council may, after it has considered all objections, confirm, amend, or withdraw the determination or amendment and may determine another, on the date on which the determination or amendment will come into operation.
 - 7.6** After the Council has considered the objections it will again give notice of the determination, amendment or date as determined above and will also publish it as determined by the Council.
 - 7.7** The municipality must adopt by-laws to give effect to the implementation and enforcement of this tariff policy.

8. Categories of Customers

- 8.1** Separate tariffs structure may be raised for the following categories of customers –
 - 8.1.1** domestic;
 - 8.1.2** indigent households;
 - 8.1.3** business and commercial;
 - 8.1.4** industrial;
 - 8.1.5** agricultural
 - 8.1.6** rural;
 - 8.1.7** public benefit organisation;
 - 8.1.8** institutional;
 - 8.1.9** commercial and industrial with special agreements;
 - 8.1.10** government; and
 - 8.1.11** the municipality.
- 8.2** The Municipality, in line with section 75 of the Act, determine that differentiated tariffs for the different consumers in certain geographical areas are necessary where there is a substantial difference between the infrastructure used in each geographical area to provide the service. These geographical areas are –
 - 8.2.1** <unknown>.
- 8.3** The differentiation contemplated in paragraph 8.2 above will be based on one or more of the following elements –
 - 8.3.1** infrastructure costs;
 - 8.3.2** volume usage;
 - 8.3.3** availability; or
 - 8.3.4** service standards.

9. Service Classification

9.1 In the following classification, trading and economic services must be financially ring-fenced and financed from service charges while community and subsidized services will be financed from rates and related income.

9.2 In order to isolate the costs associated with a service, the Municipal Manager, Chief Financial Officer and Executive Mayoral Committee of the Council, shall, subject to the guidelines provided by the National Treasury, provide for the classification of services into the categories as set out in paragraphs 9.3 to 9.6 below.

9.3 Trading services

9.3.1 Water and electricity provisions are trading services. Typically the consumption of a trading service is measurable and can be apportioned to an individual consumer. These services are managed like businesses. The tariffs for these services are determined in such a way that a net trading surplus is realized. The trading surplus is used to subsidise the tariffs of non-trading services, in other words to relieve property rates.

- Water
- Electricity

9.4 Economic services

9.4.1 Sewage and domestic household removal are economic services. The consumption of an economic service can be measured or determined with reasonable accuracy and apportioned to an individual consumer. Whilst they are also managed like businesses, the tariffs for these services are normally determined in such a way that user charges cover the cost of providing the service.

- Refuse removal
- Sewerage
- Markets
- Abattoir fees
- Holiday resorts
- Recreation resorts
- Caravan and Camping facilities

9.5 Community services

9.5.1 Community services are those services the consumption of which cannot be determined nor apportioned to individual consumers. These services are typically financed through finance rates. Examples are the establishment, operation and maintenance of parks and recreation facilities, provision and maintenance of roads and storm water drainage systems, the establishment, management and maintenance of cemeteries and traffic regulation.

- Abattoirs

- Cleansing
- Control of public nuisances
- Environmental and waste management
- Facilities for accommodation, care and burial of animals
- Fencing and fences
- Interest rates charged
- Local amenities
- Markets
- Municipal parks and recreation
- Municipal roads
- Museums
- Nature reserves
- Noise pollution
- Public places
- Road signs
- Sports grounds
- Street lighting
- Storm-water management
- Trade licenses
- Traffic control
- Municipal public works (only in respect of the needs of the municipality in the discharge of its responsibilities and to administer functions specially assigned to it under the Constitution or any other law)

9.6 Failure of a meter

- 9.6.1 During the period from identification of a meter having ceased reading, to when it is replaced and a reading can be taken, an estimated consumption will be applied.
- 9.6.2 Should a consumer have been billed a zero consumption for any period of time and it is subsequently found to have been due to a ceased meter and the property was not vacant at the time or the usage pattern had not changed, the municipality shall bill retrospectively from the time that the meter had ceased until the time it has been replaced. Should the property have been vacant or where the usage pattern had changed, a signed and sworn affidavit needs to be provided for consideration. A meter audit report must be submitted monthly to Chief Financial Officer/ section 80 committee on why meters were not read.

9.7 No account received

- 9.7.1 In the event that an owner or occupier has consumed water and electricity but has never received an account, the onus will be on the owner to make representations to the municipality to request that an account be sent. Should the municipality not be able to verify that an account was indeed issued to either the owner or occupier, the municipality may bill for a period not

greater than three years, give a 60% discount and the consumer may make arrangements with the municipality to pay off the amount.

- 9.7.2 Any person who has stopped receiving an account that had previously been received, should immediately request the municipality in writing via registered post to remedy the omission.

9.8 Subsidised services

- 9.8.1 Subsidised services include fire fighting, approving building plans and the construction of buildings, leasing of municipal facilities, selling of burial sites and certain town planning functions. Subsidised services are those services the consumption of which can be determined reasonably accurately and apportioned to individuals and consumers. However, if the tariffs for using this service were based on its real cost, nobody would be able to afford it. In most cases not only would the consumer benefit from using the service, but also other persons. A user charge is payable for using the service, but the tariff is much lower than the real cost of providing the service

- Angling permits
- Billboards
- Burials and cemeteries
- Control of undertakings that sell liquor to the public
- Distribution of hand-bills
- Dog licensing
- Fire fighting services
- Health and ambulance services
- Holiday resorts
- Interest rates charged
- Letting of Municipal facilities
- Leasing of Municipal properties
- Libraries
- Licensing and control of undertakings that sell food to the public
- Licensing of motor vehicles and transport permits
- Local tourism promotion
- Parking
- Photocopies
- Pound fee
- Recreation resorts
- Reference and information fees
- Rezoning
- Tender deposits
- Town planning
- Training Courses

- 9.8.2 The Municipality also provides services in support of the above-mentioned services. These are called staff functions and include committee services, records and archives, financial management accounting and stores, occupational health and human resources management. These services are financed through property rates.

10. Expenditure Classification

10.1 Expenditure will be classified into the categories as set out in paragraphs 10.2 and 10.3 below.

10.2 Subjective classification:

- 10.2.1** Salaries, wages and allowances
- 10.2.2** Bulk purchases
- 10.2.3** General expenditure
- 10.2.4** Repairs and maintenance
- 10.2.5** Capital charges (interest and redemption) / depreciation
- 10.2.6** Contribution to fixed assets
- 10.2.7** Contribution to funds –

- 10.2.7.1 Bad debts;
- 10.2.7.2 Working capital; and
- 10.2.7.3 Statutory funds.

- 10.2.8** Contribution to reserves;
- 10.2.9** Gross expenditure;
- 10.2.10** Less charge-out;
- 10.2.11** Net expenditure;
- 10.2.12** Income; and
- 10.2.13** Surplus/Deficit.

10.3 Objective classification:

- 10.3.1** Licensing of motor vehicles and transport permits
- 10.3.2** Cost centres will be created to which the costs associated with providing the service can be allocated –
 - 10.3.2.1 Department
 - 10.3.2.2 Section/service
 - 10.3.2.3 Division/service
 - 10.3.2.4 The subjective classification of expenditure each with a unique vote will be applied to all cost centres.

11. Cost Elements

11.1 The following cost elements to be used to calculate the tariffs for the different services

- 11.1.1 Fixed costs** which consist of the capital costs (interest and redemption) on external loans as well as internal advances and or depreciation whichever are applicable to the service and any other costs of a permanent nature as determined by the Council from time to time.
- 11.1.2 Variable costs** which include all other variable costs that have reference to the services.

11.1.3 **Total cost** consisting of the fixed cost and variable cost.

12. Tariff Types

12.1 In determining the type of tariff applicable to the type of service the municipality shall make use of the following eight options or a combination of the same.

12.1.1 Single tariff: this tariff shall consist of a cost per unit consumed. All costs will be recovered through unit charges at the level where income and expenditure breaks even. Subject to a recommendation by the Chief Financial Officer the council may decide to approve profits on trading services during the budget meeting. Such profits will be added to the fixed and variable cost of the service for the purpose of calculating the tariffs.

12.1.2 Cost related two to four part tariff: this tariff shall consist of two to four parts. Management, capital, maintenance and operating costs will be recovered by grouping certain components together. Management-, capital- and maintenance costs may be grouped together and be recovered by a fixed charge, independent of consumption for all classes of consumers, while the variable costs may be recovered by a unit charge per unit consumed. Three and four part tariffs will be used to calculate the tariff for electricity and to provide for maximum demand and usage during limited demand periods.

12.1.3 Inclining block tariff: this tariff is based on consumption levels being categorised into blocks, the tariff being determined and increased as consumption levels increase. This tariff will only be used to subsidised free basic services and prohibit the exorbitant use of a commodity. The first step in the tariffs will be calculated at break-even point. Subsequent steps will be calculated to yield profits and to discourage excessive use of the commodity.

12.1.4 Declining block tariff: this tariff is the opposite of the inclining block tariff and decreases as consumption levels increase. The first step will be calculated by dividing the fix and variable cost and profit determined by council from time to time by the volume consumed. This tariff will only be used for special agreements.

12.1.5 Regulating tariff: this tariff is only of a regulatory nature and the municipality may recover the full or a portion of the cost associated with rendering the service.

12.1.6 Sliding scale: This tariff is based on consumption levels being categorised into blocks, the tariff being determined and increased as consumption levels increase. This tariff will only be used to prohibit the exorbitant use of a commodity. The first step of this tariff will be free of charge to provide access to the basic services to Indigent Households. The second step in the tariffs will be calculated at break-even point. Subsequent steps will be calculated to yield profits and to discourage excessive use of the commodity.

12.1.7 Availability charges: Payable in respect of erven not connected to Council's infrastructure. Once Council provided a connection, normal tariffs as per respective service are payable.

12.1.8 Recoverable work: These tariffs shall apply to consumers who are making use, on application, of certain recoverable services. The tariff will be calculated at actual cost plus a surcharge as determined with the actual tariffs.

13. Deposits

13.1Deposits are required where levies are made in arrears.

13.2Deposits are payable with application for relevant service –

- 13.2.1 Electricity: Two times the average monthly consumption of the past 2 months with a minimum of R 1000;
- 13.2.2 Water: Two times the average monthly consumption of the past 2 months with a minimum of R 500;
- 13.2.3 Rental: Equal to the monthly rental; and
- 13.2.4 Other services: <unknown>

13.3Deposit to be doubled in case of non-payment of account.

13.4 Indigent households are not required to pay a deposit.

13.5A bank guarantee can be accepted in cases where a deposit of R2 500 or more is required

13.6No deposit required for pre-paid meters.

14. Unit of Measurements

The following cost elements to be used to calculate the tariffs for the different services –

14.1 Electricity

14.1.1 Unit of measurement –

- 14.1.1.1 Maximum demand (kVa) plus fixed tariff plus kWh consumed;
- 14.1.1.2 Fixed tariff plus kWh consumed; or
- 14.1.1.3 Unit tariff (KWh consumed) (for pre-payment meters).

14.1.2 Method of calculation –

- 14.1.2.1 The guidelines issued by the National Electricity Regulator from time to time will form the basis of calculating tariffs.
- 14.1.2.2 To recover the capital cost of supplying electricity through a fixed charge will make electricity unaffordable to many low consumption users. Cross subsidisation between and within categories of consumers will be allowed based on the load factors of the categories and consumers within the category. Portions of the fixed costs will be recovered through an energy or time-of-use charge. To apply the abovementioned principle the cost allocation basis, cost groupings, tariff components and tariff types reflected in the following tables will be used:

Inclining block tariff (IBT) tariff structure (Residential, Business and Commercial with prepaid electricity meters) where customer's consumption is divided into blocks and each subsequent block has a higher energy rate (c/kWh). The tariff structure has been set by NERSA in order to protect/ cross-subsidise low income domestic customers and to promote energy efficiency

14.1.3 For the one-part single energy rate tariff, all costs are expressed in a single cents/kWh charge. The recommended methodology for allocating costs into this tariff is as follows:

14.1.3.1 The rands / kVa / month cost must be allocated into a cents / kWh charge through consideration of the average load factor of the types of customer who are likely to use the one-part single energy rate tariff.

14.1.3.2 The rands / customer / month fixed cost should also be allocated into the cents/kWh charge and allocated to the kWh purchase costs in such a way as to ensure that at a level of monthly consumption of 400 kWh, the full amount of the fixed costs would have been recovered through the cents/kWh charge

14.1.3.3 The two-part tariff:

14.1.3.3.1 The rands / kVa / month charge must be allocated into a cents/kWh charge through consideration of the average load factor of the types of customer who are likely to choose the two-part tariff. This reallocated charge must then be added to the kWh purchase charge.

14.1.3.3.2 The rands / customer / month charge is not reallocated into other tariff elements.

14.1.3.3.3 The tariff then consists of a fixed monthly charge plus a variable charge related to metered kWh consumption.

14.1.3.4 The two-part time-of-use tariff:

14.1.3.4.1 The rands / kVa / month charge must be reallocated into different time-of-use cents / kWh charges through consideration of the load curve of the customer in relation to the load curve of the supplier. Such reallocated charges must then be added to the kWh purchase charges, as appropriate.

14.1.3.4.2 The rands / customer / month charge is not reallocated.

14.1.3.5 The three-part tariff:

14.1.3.5.1 The rands / kVa charge recovers the capital cost elements. Some of this cost must be reallocated into different tariff elements.

14.1.3.5.2 The cents / kWh charge therefore recovers the full variable costs as well as a portion of the reallocated rands / kVa costs.

14.1.3.5.3 The rands / customer / month charge is not reallocated.

14.1.3.6 The three-part time-of-use tariff:

14.1.3.6.1 As with the standard three-part tariff, a portion of the rands / kVa / month charge needs to be reallocated into the various time-of-use cents / kWh charges. Again, the amount of the reallocation should be with regard to the customer's load factor. However, it is also necessary to consider the time-variation of the capacity

costs in the reallocation of the rands / kVa charge into the various time-of-use cents / kWh charges.

14.1.3.6.2 The cents / kWh charge therefore recovers the full variable costs as well as a portion of the reallocated rands / kVa charges.

14.1.3.6.3 The rands / customer / month charge is not reallocated.

14.1.3.7 Where council decides to make a profit on the service the profit will be added to the fixed and variable cost before tariffs are calculated.

14.1.3.8 Where a property is not connected to the electricity reticulation system but can reasonably be so connected, an availability tariff will be payable. The tariff will be calculated by adding a surcharge of 50% to the fixed costs applicable to connected consumers per category.

14.1.3.9 Electricity meters will be read and levied on a monthly basis unless the service is rendered through a pre-payment device and is recoverable for the past 2 years with issuing of clearance certificates.

14.1.3.10 The following charges can be levied in addition to the standard monthly charges –

Electricity are charged at an inclining block tariff per unit based on the number of kWh purchased, which is determined as follows:-

- Block 1: 1 to 50 kWh
- Block 2: 51 to 350 kWh
- Block 3: 351 to 600 kWh
- Block 4: >600 kWh

9.3.2.2 Should the customer have any municipal

14.2Water

14.2.1 Unit of measurement –

14.2.1.1 Kiloliters used; and/or

14.2.1.2 Size of connection

14.2.2 Method of calculation –

14.2.2.1 A basic charge based on the size of the water connection will be payable by all consumers.
Provision will be made for the following meter connections –

15 mm
20 mm
25 mm
40 mm
50 mm
75 mm and
>75 mm

14.2.2.2 Stepped tariffs in respect of Domestic Consumers will be calculated for the follow usages –

0 - 6 kl
7 - 10 kl
11 - 30 kl
31 - 55 kl
56 - 80 kl
> 80 kl

14.2.2.3 Consumption less than 6 kl of water per month will be supplied free of charge.

14.2.2.4 Consumption between 7 – 10 kl of water per month will be supplied break even costs.

14.2.2.5 The following surcharges will apply to all other categories –

11 - 30 kl = 20%
31 – 55 kl = 30%
55 – 80 kl = 35%
> 80 kl = 40%

14.2.2.6 Kiloliters used; and

14.2.2.7 Consumers that can but are not connected to the water service will pay an availability tariff.
The tariff will be calculated by dividing the fixed and maintenance cost of the service by the number of properties and average size of the properties in the following categories –

1 m² - 2 000m²
2 001m² - 5 000m²
5 001m² - 10 000m²
> 10 000m²

14.2.2.8 Kiloliters used; and

14.2.2.9 Break even will be calculated by dividing the total cost by the total volume consumed.

14.2.2.10 Water meters will be read and levied on a monthly basis and is recoverable for the past 2 years with issuing of clearance certificates.

14.2.2.11 When consumption is not measured a flat rate will be applicable.

- 14.2.2.12 In the time of scarcity of water, Council may declare water restrictions and may charge higher tariffs with a sliding scale as determined by Council.
- 14.2.2.13 The following charges can be levied in addition to the standard monthly charges –
- 14.2.2.13.1 Charges for connections to the main supply;
 - 14.2.2.13.2 Charges for connection of water supply;
 - 14.2.2.13.3 Charges for reconnections;
 - 14.2.2.13.4 Testing of meters;
 - 14.2.2.13.5 Special readings;
 - 14.2.2.13.6 Filling of swimming pools; and
 - 14.2.2.13.7 Any other services.

14.3 Refuse Removal

14.3.1 Unit of measurement –

- 14.3.1.1 A fixed rate per month for the removal of refuse once per week;
- 14.3.1.2 A fixed rate per month for the removal of refuse three times per week;
- 14.3.1.3 A fixed rate per month for the removal of refuse five times per week;

14.3.2 Method of calculation –

- 14.3.2.1 The mass refuse disposed by the various category consumers will be used to apportion the total cost of the service between the various categories consumers.
- 14.3.2.2 The costs per unit of measurement will be determined by the total costs of the service by the total mass of refuse disposed of during the year. The total cost of the service includes the removal cost plus the operating cost associated with the management of the refuse site.
- 14.3.2.3 The cost associated with the removal of bulk containers will be determined by calculating the actual disposal and removal cost (labour, material and transport) (iv) The minimum cost for a container service will be equal to one removal per week. (v) Opportunity costs for once-off removals will be the actual costs as described in section (3)(b)(iii) plus 20% surcharge.
- 14.3.2.4 The monthly levy is payable by the registered owner and is recoverable with issuing of clearance certificates.

The following tariff structures were basically used for the determination of tariffs:-

- Residential (domestic customers) – maximum of one removal per week.
- Flats/ Town Houses – maximum of one removal per week.
- Business/ Commercial/ Industrial (Non – Bulk) – maximum of one removals per week.
- Business/ Commercial/ Industrial (Bulk) – Individual arrangements as per trade waste tariffs
- Special tariff arrangements determined and approved by Council from time to time for specific developments and/or informal settlements.

14.4 Sewerage

14.4.1 Unit of measurement –

- 14.4.1.1 Size of the erf; and/or
- 14.4.1.2 Number of cisterns or urinals; and/or
- 14.4.1.3 Formula driven waterborne tariff.

14.4.2 Method of calculation –

14.4.2.1 All owners of undeveloped stands will pay an availability charge based on the average size of an erf (currently calculated between 1 501m² - 3 000m²) and fixed cost associated with the service.

14.4.2.2 All owners of developed stands will pay a basic charge based on the cost associated with the service and the weighted average of the number of consumers and average size of the stands in a range of stand sizes, as follows –

1m² - 1 500m²
1 501m² - 3 000m²
3 001m² - 10 000m²
10 001m² - 25 000m²
25 001m² - 100 000m²
100 000m² - 300 000m²
> 300 000m²

14.4.2.3 Waterborne tariffs will be based on the variable cost of the service per category user and the number of cisterns or urinal.

3. Strategic Focus

(1) Policy Objectives

- (a) To ensure certainty and clarity as to amounts payable in respect of property rates; identify all rateable property that is not rated, to take into account the effect of rates on organizations conducting public benefit.

- (b) To spread the rates burden impartially, fairly, equitably and without bias, and determine or provide criteria for the determination of -
 - (i) categories of properties for the purpose of levying different rates, and
 - (ii) categories of owners of properties for categories of properties, for the purpose of the granting of exemptions, rebates and reductions;
 - (iii) increase or decrease rates**
- (c) To determine how the municipality's power must be exercised in relation to multi-purpose properties;
- (d) To ensure the efficient, economic and effective use of resources and to contribute towards the financial sustainability of the municipality;
- (e) To determine measures to promote local economic and social development and endeavor to attract investment for job creation;
- (f) To create an opportunity for public participation in policy making and contribute towards the accountability and transparency of the municipality;
- (g) To take into account the effect of rates on the poor and to protect citizens against exploitation by the municipality.

(2) **Principles of Taxation**

An ***autonomous tax*** that the determination and levying of the tax will be in the discretion of the council of the municipality with regard to rebates and exemptions.

(3) **Determining the Rate on Property, Exemptions, Rebates and Reductions**

- (a) The council shall as part of each annual operating budget component impose a rate in a rand on the market value of all rateable property as recorded in the municipality's valuation roll and supplementary valuation roll. Rateable property shall include any rights registered against such property, with the exemption of a mortgage bond.
- (b) The council of the municipality will annually consider the impact of rates on the community; the impact of rates on businesses; the current economic climate, the Integrated Development Plan (IDP) of the municipality; the Town Development Strategy and the Financial Plan of the municipality.

- (c) Mitigating major shocks to ratepayers when moving from a site rating to the total market value (land and buildings) of a property and development.
- (d) The council shall further, in imposing rates for each financial year, strive to ensure that the aggregate budgeted revenues from property rates, less revenue foregone and less any contribution to the provision for bad or doubtful debts, not to exceed 35% of the municipality's aggregated budgeted net revenues for the financial year concerned.

4. Other Key Policy Principles

(1) Equity

- (a) **All persons liable for the payment of rates will be treated equitable and fair.**
- (b) The fundamental principle is that taxpayers in similar circumstances to pay similar levels of tax and taxpayers with greater ability to pay larger amounts of tax, however, in local government the value of a ratepayer's property is the proxy or surrogate for the ability to pay.
- (c) The circumstances for an individual ratepayer **or categories of ratepayers** are only taken into account in respect to any exemptions, rebates or reduction that may be granted. Rates are *levied on an ad valorem* (by value) basis that is pro-rata to the value of the property.
- (d) In the local government context the application of the *equity* principle would suggest that the tax (the rate in the rand) would be the same for all ratepayers in a municipal area, unless some compelling application of other taxation principles changes in the incidence of the tax. The main reasons why one ratepayer **or categories of ratepayers** may pay a different rate than another ratepayer are:
 - (i) different rates levied on different categories;
 - (ii) exemptions;
 - (iii) rebates; and
 - (iv) reductions.

- (e) Although these mechanisms were created by the MPRA, the application thereof should be justified. The main reason is to retain the historical level of contribution of the various categories of properties to the income from assessment rates and thereof minimize the impact on ratepayers.

(a) The current tariffs will be reviewed annually and measured against neighboring municipalities tariffs with similar rateable categories.

(2) Affordability

In considering affordability, the total municipal account, and not only the rates account will be considered. The council of the municipality will endeavour to limit the annual increase in the revenue from property rates to a threshold in the framework of the yearly macro directives issued by the national treasury or other relevant regulations issued on a year to year basis at the time of tabling the annual operating budget, except when the approved Integrated Development Plan of the municipality demand for a greater increase. **The local economic situation impacting a person or categories of persons can also be considered when public participation reveals such occurrence.**

(3) Poverty Alleviation

The effect of rates on the poor has been taken into account in terms of the municipality's Free Basic Services and Indigent policy. The **first R15 000,00** of the value of all residential property according to the approved valuation roll will be exempted from the payment of assessment rates *plus a further 100% discount for registered and approved indigents*. Additional alleviations can be considered by council in the tabling of the yearly operating budget of which will be reflected in the indigent policy.

(4) Limitation of Rates Increases

- (a) The transformation from a site rating system to a system where the total value (land and buildings) will be rated will cause major shifts in the rates burden on the owners of certain properties.
- (b) As guideline the implementation of the Municipal Property Rates Act should not lead to an increase in the income from assessment rates, and it should not result in major deviation from previous tax structures or shocks to ratepayers. To give effect to these guidelines it is necessary to set limitations to the increase of rates for the four financial years for which the first valuation roll compiled in terms of the MPRA is implemented.

5. Amounts due for Rates

- (1) The council of the municipality shall as part of each annual operating budget determine a rate in the rand for every category of ratepayer. The determination of such rate shall concur with the limits as per section 16(1) of the MPRA on property that would materially and unreasonably prejudice:
 - (a) national economic policies;
 - (b) economic activities across the municipal boundaries;
 - (c) the national mobility of goods, services, capital and labour.
- (2) Therefore, in terms of section 17(1) of the MPRA specified impermissible rates are excluded from the rating structure and are reflected as exemptions under section 10(3) of the policy.
- (3) the assessment rates tariffs for the 2017 / 2018 financial year

 - 1.2.5. developments in financial planning (including the MFMA, GRAP and National Treasury procedural enhancements);
- 1.3. The second step in the formulation of the Long-term Financial Plan is the preparation of a set of **municipal planning indicators** which should include, at least, the following –

- 1.3.1. demographic trends such as age structure and the nature of the labour force;

 - 1.3.3. reprioritisation in policy as the municipality develops, both with regard to the nature of services to be provided (e.g. broadband infrastructure) as well as the levels of service delivery expected as ever higher quality becomes the norm;
 - 1.3.4. changes in payment levels that permit a sustainable budget and hence greater access to external resources (e.g. borrowing, etc);
 - 1.3.5. changes to the staff structure as well as skills balance within the municipality; and
 - 1.3.6. any other material trends or projections that can be ascertained.
- 1.4. The third step in the formulation of the Long-term Financial Plan is the compilation of a **planning framework** which should provide the following –
- 1.4.1. an outline of anticipated municipal policy and priorities as they change over time;
 - 1.4.2. a realistic annual revenue projection based upon such outline;
 - 1.4.3. a realistic annual expenditure projection based upon such outline; and
 - 1.4.4. a proposed strategy to address any imbalances between anticipated revenue and expenditure;

2. Implementation at the Municipality

- 2.1. The process of developing such a Long-term Financial Plan is complex and time-consuming and requires a range of specialist skills.
- 2.2. Given the limited capacity of the Chief Albert Luthuli Local Municipality, the municipality will seek to co-operate with the Gert Sibande District Municipality in the development of both nation-wide and municipal (district) planning indicators (as set out in sections 1.2 and 1.3 above).
- 2.3. The Chief Albert Luthuli Municipality will then develop a planning framework that will meet the needs of its Long-term Financial Plan in line with section 1.4 above.
- 2.4. The Council should adopt this Long-term Financial Plan annually when the mayor tables the IDP process plan as well as the budget timetable before 31 August – i.e. 10 months before the start of the financial year.

Chief Albert Luthuli Municipality

Indigent Policy

- **Introduction**

- The Chief Albert Luthuli Municipality reaffirms its commitment to the national principles that should underpin indigent policy –
 - Everyone has inherent dignity and the right to have their dignity respected and protected. All process that involves the provision of services to citizens must be done in such a manner as to respect the entrenched rights and dignity of those citizens.
 - Municipalities must provide basic services to its indigent in a sustainable manner. It is not expected that a municipality will provide Free Basic Services beyond its financial and other capacities.
 - Indigents must be afforded access to more than just the Free Basic Services package. It is widely acknowledge that the Free Basic Services package on its own will not see indigent communities standards of living improve. It is imperative that linkages be made between the Free Basic Services package and the broader package of social services.
 - In providing Free Basic Services to indigents, municipalities must provide these services at the recognised and approved minimum basic levels. Municipalities are not dissuaded from providing a higher level of a service if they can afford to do so, and can sustain this higher level.
 - Free Basic Services are targeted at the indigent. Therefore a municipality can use any approach it chooses to provide Free Basic Services as long as it can ensure and demonstrate that the indigent are benefiting from Free Basic Services.

- The municipal indigent policy is not a stand alone policy which is independent from municipalities' IDP's, its debt and credit control procedures, its municipal by laws etc. Municipalities' indigent policies need to be developed to integrate with these strategic management plans and procedures so as to ensure that the municipalities will be able to sustain their Free Basic Services programme.
 - Municipalities need to start planning realistic exit strategies for their indigent populations to exit from the indigent registers and subsidies. This will entail that the living circumstance of the indigent has improved significantly so that the indigent can afford to pay for their service. What this implies is that municipalities should integrate their Free Basic Services delivery with structured poverty alleviation programmes.
 - Due to the varying circumstance and conditions within municipalities it is recognised that municipalities should exercise their right to apply the national indigent framework and these guidelines according to their own circumstances.
-
- This Indigent Policy will –
 - allow the municipality to target the delivery of essential services to citizens who experience a lower quality of life;
 - identify how the indigent will be accessed;
 - establish the process that will be used to manage the indigent;
 - identify the process for tracking and assessing the service received by the indigent, as well as the real benefit that has resulted from the subsidies;
 - provide policy direction to the municipality's IDP's and financial planning instruments;
 - establish the process to set targets (milestones) for the rollout of free basic services to the entire indigent population within the municipal area; and
 - *identify the linkages between the various poverty alleviation programmes that will result in the indigent moving away from the poverty trap.*
-

2.2 Tenders (R200 000 and above)

The supply chain management section shall manage procurement requisitions for amounts estimated to be in excess of R200 000 excluding VAT by calling for tenders. The request for such tenders shall be prepared by the supply chain management section, shall be prominently displayed on the municipality's website, all the notice boards, referred to under part 2.1 above, and shall additionally be advertised in one local newspaper of repute (if there is a local newspaper) and one national newspaper of repute or in both such newspapers if the estimated value of the tender exceeds R1 000 000 (one million rand). Notices calling for tenders shall comply with all the requirements indicated for quotations under part 2.1 above, except that the closing date shall be at least 14 (fourteen) days after the date on which the call for tenders is first displayed or advertised, whichever date is the later.

For a tender to be considered it must comply with all the requirements indicated for quotations under part 2.1 above, except that a tender must be placed in the tender box provided for this purpose, the location of which shall be clearly specified in the relevant notice calling for tenders.

The chief financial officer shall ensure that such tender boxes are sealed until the date and time of their official opening, and that they are properly secured at the time.

Where the relevant notice specifies that prospective tenderers must complete certain documentation which must be obtained from the municipality, failure to complete such documentation shall render the tender invalid.

The relevant notice may also specify that a non refundable fee, as determined from time to time by the council, is payable in order to obtain such documentation

2.3 Quotations and Tenders Not to Specification

Notwithstanding the above-stipulated requirements for consideration, tenders which are not to specification may be considered, but only if no tenders are received which substantially comply with the specification upon recommendation by the bid committees and approval by the accounting officer. For quotations, consideration as per above can be given upon recommendation and approval by parties as per the SCM Policy.

2.4 Use of Database of Suppliers

The supply chain management section shall at least annually, by notice and advertisement as for tenders under part 2.2 above, request prospective suppliers, either generally or for specified ranges of goods and services, to submit their names and other relevant details to the procurement section for inclusion in a database of suppliers. The database should be updated at least quarterly. Such details shall include an indication of the goods and services normally provided.

The procurement section shall then, in addition to the communication processes specified under parts 2.1 and 2.2 above, forward – either electronically or by facsimile – copies of any notices of quotations and tenders to the relevant suppliers. However, failure by the procurement section to forward such notices or the non-receipt of such notices by any supplier shall not invalidate the procurement process. The onus remains on the prospective suppliers to apprise themselves of the municipality's requirements as indicated in the prescribed communication processes set out under parts 2.1 and 2.2 above, and the additional notification by virtue of the supplier's being included in the database of suppliers shall be viewed simply as a courtesy on the part of the municipality.

The inclusion of any supplier in the database of suppliers by no means obviates the need for such supplier to respond in the prescribed manner to notices of the municipality's procurement requirements.

PART 3 ADJUDICATION OF QUOTATIONS AND TENDERS

Notwithstanding any of the requirements set out below, the municipality shall not be obliged to accept any quotation or tender received.

3.1 Quotations

After all the requisitions have been processed and quotations have been received, will then evaluate the quotations as per paragraph 18(f) of the SCM Policy.

All quotations to the value of R30 000 shall be evaluated and adjudicated by the supply chain section. The lowest quotation substantially to specification shall be accepted, taking into account the municipality's preferential procurement requirements as set out, provided the municipality is satisfied that it offers acceptable value for money for the municipality.

If no quotation is substantially to specification, the lowest quotation which is closest to specification shall be accepted, provided the municipality is satisfied that it offers acceptable value for money for the municipality, and provided further – if the goods or services concerned are being procured for a specific department or departments – that the head(s) of such department(s) concur(s) with such acceptance.

The supply chain management shall fill the requisition for order form and forward it for approval by the head of department concerned, chief financial officer and accounting officer depending on the amount charged for the service.

Quotations of value above R30 000 to R200 000 shall be evaluated by the supply chain management, recommended by the end user department, adjudicated by the chief financial officer and approved by the accounting officer, as per paragraph 18 of the SCM Policy

3.2 Tenders

All tenders with an estimated value exceeding R200 000 excluding VAT, shall be adjudicated by the tender committee, as established in terms of part 4 below, and approved by the municipal manager, acting on the written reports and recommendations of the tender committee.

The lowest tender substantially to specification shall be accepted, taking into account the municipality's preferential procurement requirements as set out in part 5 below, provided the adjudicating authority is satisfied that it offers acceptable value for money for the municipality.

If no tender is substantially to specification, the adjudicating authority may recommend acceptance of the lowest tender which is closest to specification, provided the adjudicating authority is satisfied that it offers acceptable value for money for the municipality as stated in paragraph 2.4 above.

PART 4 TENDER COMMITTEE

The municipal manager shall establish a tender committee in accordance to paragraph 26 – 29 of the SCM Policy, to undertake the adjudicating functions set out in part 3.2 above.

“To specification “ in the case of services to be provided to or works to be undertaken for the municipality shall include the furnishing of satisfactory proof of the skills and resources required to execute the bid.

PART 6 PRE-QUALIFICATION PROCEDURES

From time to time, invitations for forthcoming tenders or quotations may specify initial attendance by prospective suppliers at briefing meetings or site inspections or may require only an initial expression of interest from prospective suppliers indicating their expertise and/or other credentials in respect of the provision of the required goods or services. In such instances, the municipality reserves the right to limit subsequent invitations for the actual tenders or quotations to suppliers who have attended such meetings or inspections or who have provided reasonable evidence of the expertise or credentials required.

PART 7 GUARANTEES AND RETENTIONS

In the case of tenders for the undertaking of works on behalf of the municipality and with a value equal to or exceeding R1 000 000 (one million rand), the successful tenderer may lodge with the chief financial officer a guarantee, issued by an acceptable registered institution , for a sum equal to 60% of the agreed or estimated tender price. Such guarantee shall be lodged within one calendar month from the date on which the tender is awarded, and shall thereafter be managed in terms of the contract entered into between the municipality and the successful tenderer.

In the case of tenders where a performance guarantee as envisaged above is not required, the chief financial officer shall withhold payment of an amount equal to 10% (ten per centum) of the value of the actual goods or service supplied by the appointed contractor until the chief financial officer is satisfied that the contract has been satisfactorily executed, but provided that such final payment shall not be withheld for a period exceeding 6 (six) calendar months from the date on which final payment was due to the contractor.

PART 8 EMERGENCIES

An emergency shall be considered as an unforeseeable and sudden event, with materially harmful or potentially materially harmful consequences for the municipality, and which requires urgent action to address.

In cases where the municipal manager determines that an emergency has arisen, the municipal manager may direct that the periods for advertising quotations or tenders, as stipulated in parts 2.1 and 2.2 above, be curtailed to the extent that the municipal manager deems appropriate. Where the estimated value of the goods or services to be supplied to cater for such emergency exceeds R1 million (one million rand) excluding VAT, the municipal manager may approve such tender on behalf of the council, but provided the executive mayor or the chairperson of the executive committee, as the case may be, concurs with the view of the municipal manager that the tender must be approved to address an emergency.

PART 9 PROHIBITED ACTIONS

No head of department in placing a requisition for goods or services to be procured by quotation or tender shall knowingly understate the requirements or the estimated value of the requirements with the intention of avoiding the more stringent process prescribed for requirements of a higher value.

The municipal manager shall promptly institute disciplinary action against any head of department suspected of infringing this requirement.

No councillor or official shall engage in any contact with a prospective supplier in respect of any quotation or tender which such supplier intends to submit with the purpose of influencing any aspect of such quotation or tender.

PART 10 SALES OF GOODS

In seeking to dispose of any fixed assets, the chief financial officer shall adhere to the requirements of the municipality's policy of disposal on the management of and accounting for fixed assets, including the legal prescription annexed to that policy.

The chief financial officer shall determine in each instance having regard to the nature and estimated resale value of the assets whether it is more advantageous for the municipality to dispose of the assets in question by means of the invitation of tenders or quotations or by public auction. Notification of such intended sales shall follow the communication process prescribed for tenders in part 2.2 above, with the various notices and advertisements stating the date and time on which tenders will close for acceptance or the date, time and venue of the auction, as the case may be, as well as the date(s) and venue(s) where prospective tenderers may view the assets.

All tenders for sales of fixed assets shall be adjudicated by the tender committee under chairpersonship of the municipal manager, and shall be approved by the council on the recommendation of such committee. The highest tender substantially to specification shall be accepted, except if the adjudicating authority believes that no tender is satisfactory in terms of value for money offered.

In seeking to dispose of any stores or other items other than fixed assets, the chief financial officer shall adhere to the communication requirements prescribed for quotations. The chief financial officer shall further determine whether it is more advantageous for the municipality to dispose of the items by means of tenders or quotations or public auction, and shall in either case publish the notification of such sales in terms of the communication process prescribed in part 2.1 above. If the chief financial officer considers it necessary, such notification may also be made by means of advertisements in the local and national press.

Where stores or other items other than fixed assets are sold by means of tenders or quotations, the chief financial officer shall adjudicate and approve the quotations received. The highest quotation substantially to specification shall be approved, except if the chief financial officer believes that no quotation is satisfactory in terms of value for money offered.

PART 11 REPORTING

All approved quotations shall be listed on the municipality's website and on the notice boards referred to in parts 2.1 and 2.2 above. Quotations approved during any particular calendar week shall be listed from the beginning of the following calendar week, and shall be displayed for the duration of that week.

All approved tenders shall be listed as for quotations, but shall be listed for 2 (two) calendar weeks.

PART 12 APPEALS

Suppliers who are dissatisfied with the decision of the municipality in regard to any quotation or tender may appeal in writing to the municipal manager, provided such appeal is lodged with the municipal manager as follows:

- for quotations, within 7 (seven) calendar days of the date on which the approved quotation is first listed in terms of part 11 above
- for tenders, within 14 (fourteen) calendar days of the date on which the approved tender is first listed in terms of part 11 above.

The municipal manager shall provide written acknowledgement of the receipt of such appeals to the appellant concerned, and shall endeavour to finalise such appeals within 7 (seven) calendar days of their receipt. Where this is not possible, the municipal manager shall promptly advise the appellant in writing of the reasons for the delay.

If the appeal is based on a technically complex matter, the municipal manager may engage an impartial consultant to provide an opinion on the appeal, provided that sufficient budget provision exists for the expenditure to be incurred, and provided further that the municipal manager shall not be bound by any such opinion provided.

The municipal manager shall immediately after a ruling on an appeal has been made, advise the appellant in writing of such ruling.

If the appellant is dissatisfied with the municipal manager's ruling on an appeal in regard to a tender the appellant may request the municipal manager to refer such appeal and ruling to the ensuing council meeting for a decision. Such request must be lodged in writing with the municipal manager within 14 (fourteen) calendar days of the date on which the ruling was made.

The municipal manager shall decide whether the lodging of an appeal constitutes sufficient grounds for the municipality to delay, where possible, the procurement of the relevant goods or services in terms of the approved quotation or tender against which the appeal is lodged. If such delay is decided upon, the municipal manager shall immediately advise the approved supplier, in writing, of such delay.

PART 13 PAYMENTS AND INVOICING

All invoices for goods and services should be received by the stores and shall be submitted for payment within 5 days of receipt to the expenditure section.

All invoices pertaining to contracts managed by departments other than the finance department, shall be certified as in order for payment by the head of department concerned before being submitted to the procurement section.

PART 14 STORES (MATERIALS) MANAGEMENT

All goods procured by the municipality shall be delivered to and receipted by the stores, except if the chief financial officer, with the concurrence of the head of department concerned, directs that such goods shall be delivered to a specified site or to the sub-store maintained by the department concerned.

The procedures and charges for requisitioning goods from stores shall be determined from time to time by the chief financial officer, and shall be notified to all departments by means of departmental circulars.

Stock levels shall be determined by the chief financial officer, in compliance with the municipality's banking and investment policy, and where applicable in consultation with the head of department concerned.

PART 15 ASSET MANAGEMENT

Maintenance of Fixed Assets:

A Fixed Assets Register must be maintained, by keeping a record of all assets categorized as follows:

- Property, Plant and Equipment;
- Inventory;
- Investment Property.

The following details must appear on the Fixed Assets Register:

- Description
- Date of acquisition;
- Location of the asset;
- Department which will be using the asset;
- Title deed number (if fixed property);
- Stand number (if fixed property);
- Asset identification number;
- Original price;
- Last revalued date
- Revalued value
- Name of the person who did the last revaluation;
- Accumulated depreciation;
- Depreciation charge for the year;
- Carrying value;
- Impairment losses;
- Funding source;
- Insurance arrangement;
- Must asset perform basic municipal services;
- Has debt been secured with the asset;
- Date of disposal;
- Price of Disposal;
- Date of retirement.

When fixed assets are sold, disposed of, transferred or purchased on approval by the Council

- The fixed asset register must be up-dated; and
- The journal entries to record the sale, disposal, transfer or purchase must be processed.

Fixed Assets may also be disposed of by public auction or tender.

Transfers of Assets:

With respect to transfer of assets, a list must be produced indicating the relevant details as per asset register.

The list must be approved by the transferring Department.

The receiving Department should confirm the list of assets being transferred.

Acquisition of Immoveable Property:

The Council may acquire by purchase, or by hire, immovable property within or outside the Municipality.

Prior to finally resolving whether to purchase or hire immovable property, the Council shall advertise its intentions to do so.

After consideration of the objections, if any, lodged in accordance with the advertisement contemplated by 3.2 above, the Council:

- Shall in the case of immovable property contemplated by 3.4, comply with the provisions of that subsection; and
- May in the case of any other immovable property finally resolve whether or not to purchase or hire such immovable property.

The Municipality shall not without the prior approval of the Council proceed with the purchase or hire of any immovable property:

- Which is to be purchased at a price in excess of the market value thereof as assessed by an appraiser;
- Which is to be hired at a rental.
- Where objections have been lodged in accordance with the advertisement contemplated by 3.2 above.

The Council may accept a gift or conveyance of immovable property either absolutely for the Municipality or in trust for charitable or other public purposes connected with public worship, and

hold the same, in such trust or for such purposes as may be declared by the donors, and may administer, utilise and improve such property.

The trustees of any immovable property held in trust for any township village or settlement which has since become a Municipality or part of a Municipality under the Ordinance, may transfer such property to the Council, subject to any special trusts in their deeds of title and upon conditions not at variance therewith.

Acquisition of Moveable Property:

The Municipal Manager is responsible for the implementation of the procurement policy in relation to assets.

All asset acquisitions are to occur in terms of the budgetary provisions.

The fixed assets register should be updated for all acquisitions of moveable and immoveable property.

The assets register should be reconciled with the total assets per the general ledger.

Insurance:

Ensure that all assets are adequately insured annually with the Council's brokers. Follow up all insurance claims in respect of fixed assets by:

- Submitting the claim;
- By recording claims on the insurance register; and
- Review of outstanding claims.

Recognition of Property, Plant and Equipment in the Financial Statements:

An item of Property, Plant and Equipment (PPE) should be recognised as an asset when:

- It is probable that future economic benefits or potential service delivery associated with the asset will flow to the Municipality over a period extending beyond one financial year.
 - The cost or fair value of the asset to the Municipality can be measured reliably.
-

An item of PPE that qualifies for recognition as an asset should initially be recognised at its cost or fair value.

The cost of PPE comprises:

- Purchase price;
- Import duties;
- Non-refundable purchase taxes; and
- Directly attributable costs of bringing the asset to working condition for its intended use, such as the cost of site preparation, initial delivery, handling costs, installation costs, and professional fees such as architects and engineers fees.

When payment for an item of PPE is deferred beyond normal credit terms, its cost is the cash price equivalent. The difference between this amount and the total payments is recognised as an interest expense over the period of credit.

Administration and general overhead costs are not a component of the asset's cost unless they can be directly attributable to the acquisition of the asset or bringing the asset to its working condition.

When an item of PPE is acquired by exchange or part exchange of a dissimilar item of PPE or other asset, the cost of such item is measured at the fair value of the asset received, which is equivalent to the fair value of the asset given up adjusted by the amount of any cash or cash equivalents transferred.

Subsequent Expenditure:

- Subsequent expenditure relating to an item of PPE that has already been capitalised, should be added to the carrying amount of the asset when it is probable that future economic benefits or potential service delivery, in excess of the originally assessed standard of performance of the existing asset, will flow to the Municipality; and
- All other subsequent expenditure should be recognised as an expense in the period in which it is incurred.

Revaluations:

- When an item of PPE is revalued, the entire class of property to which that asset belongs, should be revalued;
- When an asset's carrying amount is increased as a result of the revaluation, the increase should be credited directly to the non-distributable reserves of the Municipality; and
- When an asset's carrying amount is decreased as a result of devaluation, the decrease should be recognised as an expense in the annual financial statements except in so far as the decrease may be debited in the first instance to any existing revaluation reserve.

Retirements and disposals:

- An item of PPE should be eliminated from the statement of position on disposal, or when the asset is permanently withdrawn from use and disposal; and no future economic benefit or potential service delivery is expected from it.
- Gains or losses arising from the retirement or disposal of an item of PPE should be determined as the difference between the actual or estimated net disposal proceeds and the carrying amount of the assets, and should be recognised as revenue or expenses in the statement of performance.

Chief Albert Luthuli Municipality

Water and Electricity Management Policy

1. Introduction

This Water and Electricity Management Policy has been developed to meet legislative requirements.

The Chief Albert Luthuli Local Municipality will use this policy to direct the development of appropriate strategies that can then be implemented as and when resources are available.

2. Legislative Framework

The Municipal Budget and Reporting Regulations, 2008 were published by National Treasury as Notice 393 in the Government Gazette No. 32141 on 17 April 2009. Regulation 7(1) states that –

The municipal manager of a municipality must prepare, or take all reasonable steps to ensure the preparation of the budget-related policies ¹ of the municipality, or any necessary amendments to such policies, in accordance with the legislation applicable to those policies for tabling in the municipal council by the applicable deadline specified by the mayor in terms of section 21 (1)(b) of the Act.

The footnote ¹ to this regulation lists a number of required policies including

(n) any policies related to managing electricity and water including –

(i) a policy related to the management of losses; and

(ii) a policy to promote conservation and efficiency;

This policy of the Chief Albert Luthuli Municipality has been developed to comply with the above requirement.

3. Objective

In 2004, the then Department of Water Affairs and Forestry issued the Guidelines for Water Conservation and Water Demand Management in Water Management Areas and in the Water Services Sector as part of its Integrated Water Resources Management Strategy.

In June 2009, the then Department of Minerals and Energy issued the National Energy Efficiency Strategy, which was reviewed and updated in October 2008. However, this strategy does not provide any guidance to municipalities.

The objectives of the policy of the Chief Albert Luthuli Municipality are to adhere to the above water guideline and to follow best-practice policies with regard to electricity management. The timing of the implementation may be affected by practical considerations as well the extent of resources that are available.

4. Water losses

Minimizing water loss will be achieved through an effective distribution management strategy that will incorporate the following elements:

- 4.1. A system of flow measurement throughout the bulk distribution system that allows regular measurements to be monitored, thereby allowing for timeous identification of losses;
- 4.2. An effective management system that optimizes flow rates and pressures, monitors water quality and is able to identify and rectify problems appropriately;
- 4.3. A proactive maintenance program that reduces the probability of leaks occurring in the first place;
- 4.4. A suitably resourced maintenance unit that can ensure that leaks or blockages are repaired without undue delays – either through internal capacity or through competent contractors;
- 4.5. An effective asset management program that ensures that the installed infrastructure is designed to meet present and future needs, that plans are developed timeously for refurbishments and/or replacements, and that suitable training is provided to operators; and
- 4.6. An appropriate rationing system that, in the case of severe drought or other inflow impediment, ensures that supplies to emergency services are not affected, ensures that a basic service is provided to all, yet is still able to ration supply as required.

5. Water conservation and efficiency

Maximizing water conservation and efficiency will be achieved through influencing consumer demand, controlling return flows and social awareness strategies that will incorporate the following elements:

Consumer Demand Management

- 5.1. Water efficient appliances should be promoted through LED programs that will encourage their local manufacture, installation, wholesaling and retailing;
- 5.2. Municipal building regulations should be updated to incorporate best practice in terms of water usage efficiency, especially in commercial and public buildings; and
- 5.3. Water tariffs should be determined in a manner that does not just maximize revenue to the municipality, but also influences (i.e. reduces) unnecessary water usage.

Return Flow Management

- 5.4. Monitoring sewerage flows is essential to minimize unwanted inflows and leakages will reduce operating costs while also reducing environmental & health risks;
- 5.5. Dual water systems (potable and grey) that promote water re-use should be installed wherever viable.

Social Awareness and Education

- 5.6. The fact that “water is a scarce resource” must be effectively communicated to all residents and consumers, who should be encouraged to adopt water conservation habits and practices;
 - 5.7. Campaigns should be targeted at identified groups and communicated in the most effective manner available, as well as forming an integral component of the IDP process.
 - 5.8. Awareness must also be raised and maintained within the municipality’s own staff and service providers.
-

6. Electricity conservation and efficiency

Electricity shortages are likely to reoccur in future, and municipalities will have a major role to reduce the impact upon users through influencing consumer demand through social awareness strategies that will incorporate the following activities:

- 6.1. Access, and assist local businesses to access, funding from other sources (including CDM credits) to improve electricity efficiency.
- 6.2. Develop programs in collaboration with Gert Sibande and other local municipalities to reduce overheads in the roll-out of electricity conservation and communication initiatives.

7. Implementation & Monitoring

While the Council is ultimately responsible for the development, implementation, monitoring and review of this policy, the Municipal Manager is the official responsible for its management while the Director: Technical Services should be assigned responsibility for its day-to-day management. The Department of Water Affairs and Forestry has published a number of Best Practice Guidelines and a range of supporting material in its Integrated Environmental Management Series, which should be used to support the development of strategies to drive the implementation of water-related aspects of this policy.

Other departments and public entities have developed a range of strategies, frameworks and programs, with a number of implementable projects, which should be used wherever practical. It is also important to monitor and review actual performance against the planned, even for communications and awareness strategies. Whenever the municipality undertakes any projects that incur capital expenditure, then detailed monitoring is essential, and a full assessment of the benefits (if any) conducted at appropriate intervals – as any returns on investments may take several years to achieve.
